

Health & Fitness World, Launceston City Gymnasium

After many years of 'wear & tear' to the existing floor of the **busiest Gymnasium in Tasmania**, **Health & Fitness World** chose **Gecko** to provide a NEW rubber surface in a variety of areas of their gymnasium.

The initial concern was to source a new rubber floor that was suitable in a various applications. Gymnasium Manager, Karen understood it would require a specialist to provide a surface solution that would be versatile enough to cover the varying extremities of a gymnasiums normal operating conditions.

Karen Rawlings Gymnasium Manager stated

"I am Absolutely happy with my decision to go with Gecko. They recommended floor matting that is extremely practical & it is easy to clean. We've had blood, sweat & tears on it and anything is removed easily.

After 6 months of heavy use it still looks brand new and we continue to have patrons commenting on it after all this time.

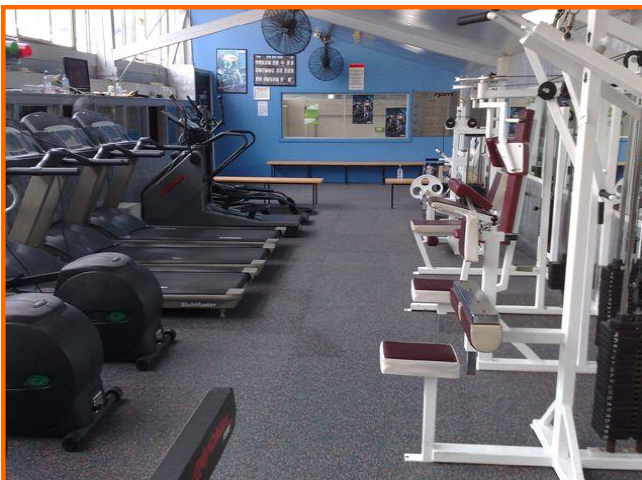

Overall a GREAT product, Gecko's service was fantastic and I would certainly use again."

The surface needs to be durable enough to stand up to weights being continuously dropped onto it, as well as being soft enough for aerobic & cardiovascular activities.

The '*Speckled Crumb*' mat was an obvious choice for this application and aesthetically it provides a colourful & attractive finish which has raised great comments from the gym patrons.

Karen opted for interlocking mats which gives the versatility to swap mats around if ever needed.
