

Oatlands Primary School, Vic GeckoPave® Multi Purpose Courts

Oatlands Primary Schools existing multi-sports court area was worn and tired from the years of use. The surface had undulations & patched up areas which looked ugly and increased the chance of children tripping over.

The school considered options for resurfacing the area, but was limited with their budget available. The GeckoPave® Acrylic Surfacing was of interest mainly because of the cost effectiveness, but also for the colourful appearance & durability of the product.

Gecko was employed to install the surface and worked with the school to arrive with a design that would suit.

Stuart Daly school principal had this to say;

“Our court area looked old & tired and needed some attention. I spoke with Gecko and we arrived with a solution to resurface the area.

Throughout the process Gecko was terrific, they kept me informed and were courteous & very willing to work in with the school.

The outcome of our new GeckoPave surface is excellent & looks absolutely fantastic the kids love it and the design has incorporated additional games.

I'd have no hesitation in recommending Gecko to anyone ”.

The layout included 2 x basketball / netball courts and 10 x four square courts which provides range of activities for the schools' 700 students to play.

The school erected a large roof over the area which allows the students use the surface in any weather condition and the anti-slip properties of the GeckoPave® ensures slipping over if water happens to spill onto the court.

GeckoPave® Acrylic Surfacing was an ideal option for this application for its' cost effectiveness & which can be applied to worn & dull existing surfaces.
