

CrossFit, Townsville QLD Indoor Training Facility

CrossFit Townsville is part of one of Australia's fastest growing gymnasium groups which offers a unique training regime by constantly varying the workout schedule.

Like any successful business maintaining customer satisfaction is imperative and for gyms its' ensuring people are comfortable and the equipment is in good nick. As part of achieving this, a good quality floor is necessary.

Through the CrossFit network Townsville learnt where others had installed a surface that provided exceptional protection and had shown great durability after years of service.

Brett Forde – CrossFit Townsville Head Coach had this to say;

"We had seen RPS' Rubber Flooring used at a CrossFit gym in Sydney for almost 5 years now and it's the only matting to survive that time. We were so convinced we installed it in our Townsville gym.

The rubber matting gets a real hammeringweights are dragged across it and we use it as a platform to drop 100 – 150kg weights onto it and we're really happy with the product.

It's refreshing that we haven't paid a premium for the RPS matting, but we know it will last far longer than others.

I am absolutely happy to recommend RPS Rubber Matting & it's so good I've upgraded the existing areas with it".

RPS Industries whom had supplied other CrossFit Gyms with their Gymnasium Rubber Mat was contacted. The RPS mat had a proven track record of providing fantastic durability whilst offering great comfort to the gymnasiums' clients and for ensuring protection to the gym equipment.

Every day the gym vacuums and mops their floor, and they have found the RPS matting to be easy to clean and maintains a good level of grip.

Since their initial order CrossFit Townsville has reordered to extend its rubber surfacing as an upgrade and proposes to do further areas over time.
