

## Lynbrook Primary School, Vic Playground & Landscape area

The **Lynbrook Primary School** identified that its' playground area was in urgent need for some attention. With water restrictions & the high amount of student traffic the school could never get grass to grow in this area. During the Winter months it became muddy & slippery, and over Summer it created dust. Under the play equipment **the tan bark soft fall material was completely unsatisfactory** and it moved about leaving minimum protection to the students. The tan bark also housed a potential hazard, foreign objects that could not be seen in the materials could be buried until found by a young child.

The school invited Gecko to forward a proposal for the area and consequently Gecko was awarded the project, although not the cheapest.

### Graeme Vance the school's leading teacher said

*"Gecko has turned our eye sore into an attractive and functional area. The results are impressive and are better than I expected . . . the quality of the grass looks great. The students love the area & also say its fantastic.*

*Gecko's new surface has created a new play area outside the equipment area and now twice as many children use it.*

*Gecko's approach was very professional and we were always kept informed of the progress.*

*I would certainly recommend Gecko to anyone in the future & in fact they're back now doing more work".*

Gecko provided a solution by firstly excavating the area and setting some new ground levels. The existing surface was full of trip hazards and undulations. The storm water pit was also raised up and the high points were lowered creating a much more functional area.

Underneath the play equipment Gecko installed its' **Soft-fall Playground System™**. This system replaces bark chips with a rubber shock-pad beneath Gecko's MS Pro® synthetic grass and conforms to the Australian critical fall height standard. The remaining area was installed with Gecko's MS Pro® 45 'Plush' Premium Synthetic Grass which attracts a 12 year 'Written' guarantee.
