

Mount Scopus Memorial College, Burwood Vic GeckoPave® Acrylic surface Multi Purpose Courts

In order to provide vehicle parking and an area for unloading trucks for the school's new building works, **Mount Scopus Memorial College** allocated their existing tennis courts for this function.

At the end of the building project & some 14 months later after the building contractors had left, the tennis court area provided for parking and unloading was beyond use for students to play sports. With the new school year fast approaching the area needed to be repaired and functional for students to use & eliminating any OH&S issues.

The timeframe was short and the school had contacted several contractors, but it was only Gecko who could commit to ensuring the job was completed by the required date.

Matt Dowlan College Ground Manager had this to say

" I contacted several businesses to look at resurfacing the area, but none were prepared to commit to the time frame and think outside the square as Gecko did.

At the very start Gecko explained to me the exact outcome considering the condition of the courts and we worked well together to draw up a design.

The end result is fantastic and the children have their area back & love it! There's always chess pieces on the chessboard and kids playing in the area. Under the circumstances it's a terrific outcome.

I can recommend Gecko & I've already used them again for other surfacing around the school "

Gecko was contracted the project and immediately set into action to firstly repair the damaged base. This provided some difficulties as the extent of damage meant digging up patches & repairing the asphalt surface with concrete which can in turn provide future difficulties when surfacing if completed correctly.

The final acrylic coats were installed and the line markings included volleyball, bat tennis & four square courts, hopscotch games and a chessboard.

The outcome was stunning.....*the transformation from the original dull & damaged surface to the new bright and colourful play area is just another example of GeckoPave® Acrylic Surfacing.*
