

Shoalhaven Caravan Park, Nowra NSW Camp Site Grass

Tent Site Immediately after installation

"Pitch your tent on lush green lawn all year round"

Gecko's synthetic grass campsites are proving to be popular with the campers!

Shoalhaven Shire Council look for alternatives when they couldn't keep grass growing in the busy tent site areas. Apart from looking ugly, they created mud in wet weather and dust in dry weather.

After the installation of Gecko campsite grass they have a clean and durable surface for campers to enjoy. An added feature of Gecko's campsite grass is that it defines the site area and keeps campers from straying.

6 months later

Daryl Merange, manager of Shoalhaven Tourist Park has made comment that "there has been a great amount of patrons raving about the tent sites. They stand up to tent pegs very well and we'll certainly be doing more sites in the future"

Benefits

- Remains green all year round
- Defines campsite areas
- Instant results
- Stands up to tent peg use
- Low maintenance
- Fire retardant
- No need to water
- No mowing
- Pet friendly
- Environmentally focused
- Remains green all year round
- UV protection that can withstand Australia's harsh climate

Tent site being utilised by camper
