

St Aloysius Catholic College, Tas GeckoPave® Multi Purpose Courts

St Aloysius Catholic College, a Kindergarten to Grade 10 College, opened its new Middle School educational facility at Huntingfield in 2009. Like any new facility there are always ongoing building works to improve and to support the existing infrastructure, and the construction of an outdoor playing court area was an important part of the overall project.

In 2010 the College selected Gecko from recommendations to install an acrylic surface on their new multi-purpose court area. The GeckoPave® was the preferred surface for its durability, cost effectiveness and quality. The design could meet the College's requirements incorporating Basketball, Netball & Tennis court lines.

Les Gardner College Business Manager had this to say;

"Our new Multi-purpose courts are constantly in use and always have children on the area.

*I was initially concerned the surface would get damaged with hard shoes & runners picking up stones and transferring them onto the courts , but I haven't seen this. **The robust & sturdiness of the surface exceeds my expectations** and once you understand the nature of the surface and its benefits there are almost no limitations. It provides all the features needed to support the college's activities".*

Immediately as the area was open there was keen interest from the students eager to access and utilise the new courts. Everyone was interested in the new bright & clean area. The GeckoPave® acrylic surface now supports the activities of over 320 students. A recent cross country run event was organised to finish on the area and it provides a fantastic venue for College assemblies.

GeckoPave® Acrylic Surfacing is an ideal cost effective product which can be applied to new or worn & dull existing surfaces.
